

## What is mPG?

mPG (Merchant Payment Gateway) is essentially an online payment system provided by mPayment for merchants to collect payments without meeting their customers. Card transactions can be executed in either (or both) of the following method:

By authorised merchant's staff (or any person with the appropriate login credentials) using the web-based mPG Admin Portal. This method does not require integration between the merchant's web site and mPG.

By the merchant's customer (i.e. account or card holder) directly over the Internet. This method requires integration between the merchant's web site and mPG.

## Why mPG?

### Secure and Reliable

mPG takes over sensitive information capturing, verification and transmission with state of the art encryption technology and via secure channels. mPG's proven track record provide assurance and trust among our merchants and their customers.

### Easy and customizable

As a hosted solution, mPG is extremely easy to setup and maintain. It's fully customizable web-based user interface allows intuitive management and smooth payment process. Clear and easy usage of the payment interfaces ensure excellent customer experience.

### Simple, Quick and Affordable

mPG is perfect for businesses that may find it complicated or time-consuming to set up a merchant credit card collection account by their own. Taking advantage of the value-added features and readily available transaction management functions in mPG, businesses will be able to start accepting payments seamlessly and quickly.

### Reporting and Administration

mPG enables merchants to track transactions and compute statistics through the generation of customized reports. Reports can be generated at anytime and anywhere. The administration portal will also allow merchants to do basic self-administration of their account such as the setting of transaction limits to manage their financial exposure.

## Features of mPG

### Credit Card Processing

Want to have the convenience of credit card payment for business?

mPG offer payment processing and card acceptance as a complete solution. mPG is designed to save time and money for small to medium-sized businesses without compromising the security requirement.

### Tokenisation Solution

Thinking of allowing your repeated customers to skip entering their credit card information for every transaction?

Utilize our readily available Tokenisation Solution! Tokenisation replaces the original, sensitive card data with a series of unique identification symbols.

mPayment was founded in 2000 and is managed by a team of very experienced electronic payment specialists. We have been involved in the payment industry for over ten years, focusing on mobile and virtual payment areas. Our solutions and services have been deployed in the Asia-Pacific region.

Our key strengths are in payment gateway operation, payment products, payment consultancy in payment solution and technical integration with customer's system.
